- Always inspect your motorcycle before each use. This control is essential in particular for your safety.
- Before starting maintenance work let the motorcycle cool down to avoid burns.
- Once self-locking nuts are removed they must be replaced by new nuts.

- When screws and nuts secured with threaded brake fluid are removed, they must be reassembled and secured in the same way.

- Do not use a high-pressure cleaner to wash the motorcycle, as water may enter the bearings, carburetor, electrical connectors, etc.

- Dispose of oils, greases, filters, fuels, detergents, brake oil, etc. in a regular way, respecting the regulations in force in your country. Also comply with the safety regulations regarding the handling of these substances. Under no circumstances allow used oil to enter drains or watercourses or to penetrate the subsoil.

WARNING

Any modification of the engine or other components designed to increase the speed or power of the vehicle will cause the expiration of the warranty coverage. Note also that these changes are prohibited by law.

Any modification that alters the characteristics of the vehicle subject to authority approval will invalidate the existing approval, making the vehicle illegal. This will cause the expiration of the warranty coverage in addition to the expiration of the insurance coverage.
